Re: Application for DevOps Engineer Position

Dear Recruiting Team:

I was excited to learn of the current opening at your Organization for a DevOps Engineer position, and I would like to be considered for this position. I recently completed my certification in DevOps Fundamentals from Staragile skills network powered by IBM Developers and this role would allow me to put my newly acquired skills to the test.

My previous experience has many transferable skills that can be applied to DevOps, I'm aiming to utilize technical proficiency and leadership abilities while transitioning into a DevOps Engineer.

This position matches well with my qualities and skills, including my talents in development, operations, and management. I have received outstanding feedback for my abilities and enthusiasm, and I am reliable in following directions and exceeding expectations. I believe my determination will make me an exceptional member of your team and I look forward to the opportunities to contribute and develop new skills.

I am eager to learn more about the role and discuss it with you in further detail. I can be reached at the provided mobile number or email address. I look forward to hearing from you soon.

Sincerely,
Rohan Raparthi
